

## **INTERGLOBE and Link High Technologies partner to provide businesses with cost-saving voice & data solutions coupled with expert computer network services and support.**

(NY, NJ, DE & PA) Taking advantage of the complementary nature of their product lines, InterGlobe Communications and Link High Technologies Inc. have entered into a partnership to provide telecommunications services. Under the terms of the agreement, InterGlobe will offer network-based capabilities and Link High Technologies will provide voice over IP (VOIP) telephone systems and computer network infrastructure and support. Both sides see enormous potential to provide businesses with cost-saving solutions that will enhance their bottom line, increase profitability and productivity.

Interglobe Communications is a Full Service Telecommunications Company established in 1992. Headquartered in New York City, InterGlobe Communications is a one-stop network service provider. InterGlobe Communications is among the most experienced competitive local exchange carriers. We are a total solutions provider offering dial tone, local and long distance services, toll-free and Internet access all on one online statement.
